

Streamline data access for faster credit supplements

Remove unnecessary delays from your mortgage origination process with MeridianLink® Mortgage Credit Link™ (MCL) Automated Supplements, a modern consumer-driven digital solution that can be used to verify borrower financial information in near real-time.

MCL's Automated Supplements can be seamlessly integrated with your existing lending workflows—enabling advanced processing, access to a secure portal for financial data access, and enhancing the borrower experience.

CUSTOMIZED BORROWER OUTREACH

Send borrower communications from a customizable email address that includes lender and loan-specific information, a secure portal link, and clear instructions for the information being requested.

FASTER TURNAROUND TIME

Direct API integration and borrower-authorized credentials significantly elevate the borrower and lender experience by replacing time consuming manual processes that once took days or week with quick, efficient results in just hours or minutes.

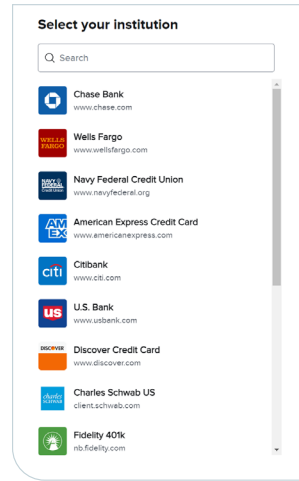

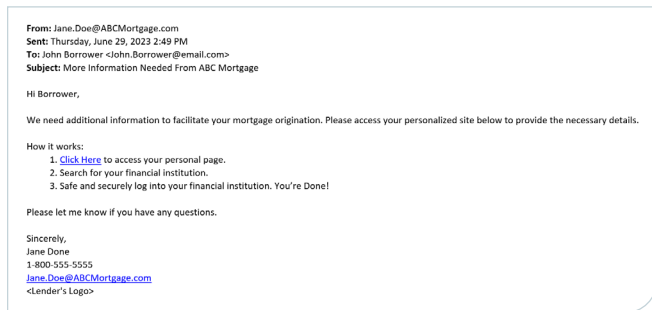

IMPROVED BORROWER EXPERIENCE

Eliminate burdensome conferences calls with borrowers and their FIs. Using Automated Supplements, borrowers can instead provide access to the same data with a few clicks from their smartphone.

How borrowers use automated supplements

STEP 1

Borrower receives an email informing them that additional information is required to process their mortgage origination. This email will include a link that will direct them to the secure portal.

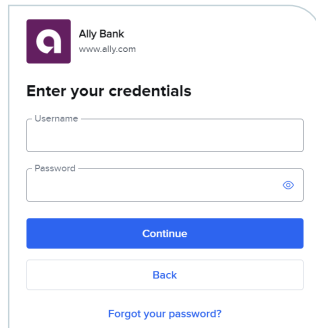

STEP 2

Borrower will follow the instructions enclosed in the email. Once they click the link they'll be directed to the secure portal where they can search for their specific financial institution (FI).

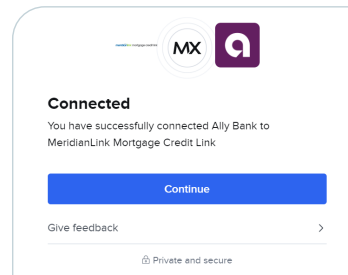

STEP 3

Once the borrower selects their FI, they're directed to the login page where they will enter their existing online banking credentials and click Continue.

DONE!

The borrower credentials are validated, their financial data is synced, and the borrower will receive confirmation that they've successfully connected their FI to MeridianLink Mortgage Credit Link.
